Incident Details

- Date of Incident:** November 27, 2024
- Date Reported:** November 28, 2024
- Time of Incident:** Estimated between 8:00 PM and 9:30 PM
- Nature of Incident:** Cybercrime (Ransomware Attack)
- Incident Description:**

On November 28, 2024, I discovered that my personal laptop had been encrypted by ransomware. All my personal files, including documents, photos, and videos, were made inaccessible. The attackers left a ransom note titled "*READ_ME.txt*" on the desktop, demanding a payment of 0.8 Bitcoin (approx. \$30,000 USD) within 48 hours to restore access.

The ransomware likely entered my system through a phishing email with an attachment titled "*Urgent_Bill.pdf*," which I opened on November 27. The attack has caused emotional distress and financial difficulties due to the loss of personal records and important files.

Actions Taken

- Disconnected the infected laptop from the internet.
- Attempted to restore files using backups, but they were incomplete.
- Notified the bank about potential data compromise.

4. Contacted the Cyber Crime Division for further assistance.

Evidence Provided

- Screenshot of the ransom note.
- Logs showing unauthorized access.
- Email logs identifying the phishing email.
- Bitcoin transaction ID: [Insert Transaction ID if Payment was Made or 'No Payment Made'].

Request from Police Department

I request an investigation into this cybercrime incident to identify the perpetrators, recover my data, and prevent similar incidents in the future.

Police Acknowledgment

The case has been registered under Section 66 (Computer-Related Offenses) and Section 66F (Cyber Terrorism) of the IT Act 2000, along with applicable sections under the IPC.
